

# Screen Updates 2

## Task #1

### Profile Onboarding Wizard UX Overhaul & Modular Component Refactoring

- **Fixed Price:** \$281.25 USD (Ramp-up: 2 hrs, Build: 7 hrs)

**Critical Domains Touched:** Business logic/core workflows (User onboarding wizard flow), GDPR/PII/User Privacy (Profile data, demographics, photo uploads).

#### Technical Assumptions:

- User model and authentication system are fully functional.
- Existing Livewire 4 setup with AlpineJS support is available.
- Design tokens and Tailwind CSS styles follow GoMate theme specifications.

#### Fixed Price Scope of Deliverables:

- **Onboarding Step Engine ( `OnboardingProfile.php` ):** Refactored step detection ( `detectCurrentStep()` ), step navigation, double-click prevention via `wire:loading.attr="disabled"` , and form validation across all steps.
- **Modular Step Cards ( `resources/views/livewire/user/onboarding/_*.blade.php` ):** Extracted 8 modular partial views ( `_name-card` , `_age-card` , `_city-card` , `_gender-card` , `_photo-card` , `_interests-card` , `_info-card` , `_review-card` ) for clean maintainability and responsive layout.
- **Form UI Components ( `resources/views/components/ui/form/*.blade.php` ):** Added reusable Blade UI components including `group` , `helper-row` , `option-tile` , and `select` .
- **Photo Upload & City Selection UX Refinement:** Redesigned circular avatar uploader with badge layout and unified option tiles for city selection across desktop and mobile views.

- **Multilingual Support:** Complete English ( `lang/en.json` ) and Greek ( `lang/el.json` ) translations for all onboarding prompt strings, labels, and review cards using `__() .`

### Touched Assets:

- [MODIFY]: Refactored onboarding step engine logic and step detection  
`app/Modules/User/Livewire/OnboardingProfile.php`
- [MODIFY]: Main wizard container incorporating step card partials  
`resources/views/livewire/user/onboarding-profile.blade.php`
- [NEW]: Step card partial for name input  
`resources/views/livewire/user/onboarding/_name-card.blade.php`
- [NEW]: Step card partial for age / birthdate selection  
`resources/views/livewire/user/onboarding/_age-card.blade.php`
- [NEW]: Step card partial for city selection  
`resources/views/livewire/user/onboarding/_city-card.blade.php`
- [NEW]: Step card partial for gender selection  
`resources/views/livewire/user/onboarding/_gender-card.blade.php`
- [NEW]: Step card partial for photo upload & preview  
`resources/views/livewire/user/onboarding/_photo-card.blade.php`
- [NEW]: Step card partial for interests selection  
`resources/views/livewire/user/onboarding/_interests-card.blade.php`
- [NEW]: Step card partial for bio / personal info  
`resources/views/livewire/user/onboarding/_info-card.blade.php`
- [NEW]: Step card partial for final review & confirmation  
`resources/views/livewire/user/onboarding/_review-card.blade.php`
- [NEW]: Reusable form group wrapper with error handling  
`resources/views/components/ui/form/group.blade.php`
- [NEW]: Form helper text container component  
`resources/views/components/ui/form/helper-row.blade.php`
- [NEW]: Selectable option tile UI component  
`resources/views/components/ui/form/option-tile.blade.php`

- [NEW]: Form select dropdown UI component  
`resources/views/components/ui/form/select.blade.php`
- [MODIFY]: English translation dictionary updates  
`resources/lang/en.json`
- [MODIFY]: Greek translation dictionary updates  
`resources/lang/el.json`

## Task #2

### Quest (Questionnaire) UX Redesign & Component Engine Standardization

- **Fixed Price:** 200 USD (Ramp-up: 2 hrs, Build: 6 hrs)

**Critical Domains Touched:** None identified

#### Technical Assumptions:

- Backend models ( `Question` , `QuestionSet` ), Livewire component logic ( `TakeQuest.php` ), and service layer ( `QuestProgressService` ) remain completely untouched.
- Existing atomic UI components under `resources/views/components/ui/` ( `progress` , `button` , `card` , `badge` ) and form elements are available and used for layout rendering.

#### Fixed Price Scope of Deliverables:

- **[QuestEngine Livewire & Blade Integration]:** Integrated `TakeQuest.php` with App Shell ( `#[Layout('components.app', ['sidebar' => false])]` ) and redesigned `take-quest.blade.php` using `<x-ui.page.panel>` , `<x-ui.page.sidebar>` , and `<x-ui.card>` .
- **[Extracted Partial & Reusable Component Engine]:** Created partials `_action-button.blade.php` (desktop/mobile navigation) and `_guidance-sidebar.blade.php` (guidance cards). Extracted standalone `<x-ui.likert>` component with dynamic parabolic size scaling and ARIA accessibility roles. Integrated `<x-ui.form.option-tile>` for choice options.
- **[Header & Navigation Standardization]:** Standardized top navbar layout across pages with `<x-next-locale-button>` , `<livewire:notifications.notification-`

`bell>`, and `<x-user.menu>`. Updated `<x-ui.nav>` to support item disabled state.

- **[UI Component Engine Standardization]:** Enhanced `<x-ui.progress>` component with updated docblock ( `class:base`, `class:indicator`, `class:status` ), fixed `$ui['root']` key typo, and refined status slot styling.
- **[Multilingual Localization]:** Updated Greek ( `lang/el.json` ) and English ( `lang/en.json` ) translation dictionaries for questionnaire copy.
- **[Automated Tests]:** Feature test suite in `tests/Feature/QuestEngine/TakeQuestTest.php` validating questionnaire rendering, options selection, and Likert component output.

### Touched Assets:

- [MODIFY]: Update Livewire component layout attribute for App Shell integration  
`app/Modules/QuestEngine/Livewire/TakeQuest.php`
- [MODIFY]: Custom styling and transition keyframes for quest view  
`resources/css/app.css`
- [MODIFY]: Add missing translation keys for quest redesign in Greek locale  
`resources/lang/el.json`
- [MODIFY]: Add missing translation keys for quest redesign in English locale  
`resources/lang/en.json`
- [MODIFY]: Refine button width, padding, and sizing for header alignment  
`resources/views/components/next-locale-button.blade.php`
- [MODIFY]: Refine neutral button variant hover state and sizing math  
`resources/views/components/ui/button.blade.php`
- [NEW]: Reusable standalone Likert scale component with dynamic parabolic size scaling and ARIA radiogroup  
`resources/views/components/ui/likert.blade.php`
- [MODIFY]: Support `:disabled` prop forwarding in navigation items loop  
`resources/views/components/ui/nav.blade.php`
- [MODIFY]: Docblock attributes update, `$ui['root']` typo fix, and status slot styling

`resources/views/components/ui/progress.blade.php`

- [MODIFY]: Standardized header navbar slot:right integration

`resources/views/livewire/events/event-list.blade.php`

- [NEW]: Action navigation buttons partial for quest questionnaire

`resources/views/livewire/quest-engine/_action-button.blade.php`

- [NEW]: Guidance cards partial for quest questionnaire sidebar

`resources/views/livewire/quest-engine/_guidance-sidebar.blade.php`

- [MODIFY]: Redesign main Livewire quiz view with App Panel shell, partials, `<x-ui.form.option-tile>`, and SVG sprite symbols

`resources/views/livewire/quest-engine/take-quest.blade.php`

- [NEW]: Feature test verifying TakeQuest Livewire view and Likert component rendering

`tests/Feature/QuestEngine/TakeQuestTest.php`
